

## WORK EXPERIENCE

---

### **CareerMap LLC | Ann Arbor, MI**

#### **PRODUCT DEVELOPMENT MANAGER | Jan 2020 - Present**

- Led development of MVP from initial roadmapping through multiple beta phases, working closely with CEO and President.
- Developed API's used to manage career data, integrate with 3rd party vendors, and save career data.
- Developed a React app that can parse and save 1500 resumes in ~20 minutes.
- Developed a React app that allows users to clean up research data and then export the data to Excel.
- Constructed development pipelines using Heroku with various deployment stages.

### **Pyramid Solutions | Bingham Farms, MI**

#### **PRODUCT DEVELOPMENT MANAGER | DEC 2019 - SEPT 2023**

- Managed small development team of 3, fostering career growth and teamwork through thought leadership.
- Repaired client relationships, resulting in a 3 year, \$5M renewal of software product services.
- Consolidated 20 different product user guides from PDF's and moved them online for easier customer access, as well as easier update management.
- Worked with Product Manager to develop an 18 month product roadmap.
- Obtained Certified ScrumMaster (CSM) certification and implemented monthly sprints, backlog refinements and sprint planning/reviews/retrospectives.
- Developed 3 new custom Java/JavaScript product plugins for IBM Case Manager.
- Implemented new CI/CD processes, allowing for automated building and deployment of products using Jenkins and Maven.

### **ELEKTROBIT | Farmington Hills, MI**

#### **FRONT-END DEVELOPER | AUG 2019 - DEC 2019**

- Updated various user interfaces for existing automotive infotainment products.
- Part of an international team developing a new infotainment system using React, CSS and HTML5.

### **DP+ | Farmington Hills, MI**

#### **WEB APPLICATION DEVELOPER | 2017 - AUG 2019**

- Developed a brand asset management web app for a client with multiple locations across Michigan. All locations now have access to a central repository of brand assets to use as needed.
- Design and develop an Alexa skill using Node.js and DynamoDB via a Lambda endpoint on AWS.
- CI/CD using Bamboo, testing frameworks Mocha and Chai and Gulp for automation.

### **APPLIED SYSTEMS INC. | Remote**

#### **INTEGRATIONS SPECIALIST | 2014 - 2017**

- Successfully coordinated and developed integrations with two popular carriers, more than doubling the amount of traffic to our servers in just one month.
- Developed 100+ products for carriers using various JavaScript frameworks and libraries.
- Updated internal web apps for improved workflow and UX, primarily front-end development with Ruby on Rails, jQuery, CSS, Bootstrap and AngularJS.
- Developed and implemented a QA Checklist for Integrations Specialists for improved product quality.
